

Kenya Photo and Story Reference Chart

Directions: This chart gives the examples of good photos and stories that show water usage by Kenyan children and young people from the *Water in Africa* website (<http://www.peacecorps.gov/wws/educators/enrichment/africa/countries/kenya/index.htm>). Be sure to read the stories carefully, because only one part of the story may be about water and children. Write down what you learn on your Graphic Organizer for Research. See the graphic organizer for directions and a sample.
