

Name: _____

Preparing Your Action Plan

Instructions: Look back at the diagram you drew of the Guinea worm life cycle. Find the areas of the diagram labeled A, B, and C. Come up with at least two ideas for breaking the Guinea worm life cycle at these different points.

At Point A:

How could you stop Guinea worm larvae from going from a person's body into the pond?

Possible actions:

1.

2.

At Point B:

How could you stop Guinea worm larvae from surviving in the water and entering water fleas?

Possible actions:

1.

2.

At Point C

How could you stop people from swallowing water fleas containing Guinea worm larvae?

Possible actions:

1.

2.

Once you have come up with at least six ideas, **circle your top two ideas**. These should be the ideas you think would:

- Reduce the number of cases of Guinea worm disease in your community
- Be possible to carry out with limited resources
